

Dear Parent,

This is to bring to your awareness that bullying or being bullied is omnipresent in our world. It starts in school at a very young age and unless we take active measures to create awareness about this phenomenon, most children will either bully others or be bullied during their school years.

Taking cognisance of this fact, the Fortis group of hospitals has initiated 'Bully to Buddy' campaign. As an integral part of this project, we are uploading a form on our school website. We request you to go through the form and have your child fill up the form honestly and upload it/send it to us. The forms will be processed and will help the Fortis team to devise a strategy to initiate the end of bullying in schools. We look forward to your cooperation.

Kindly find below the link of the bully to buddy survey questionnaires to be filled up by students.
